

Fielder Manganese

Seed Treatment

A readily available manganese formulation for immediate uptake by the germinating seed.

Fielder manganese seed treatment will supply the young plant with an immediately available manganese source to help establishment in manganese deficient soils.

Analysis w/v : Soluble Manganese (Mn) 15.0%
Sulphur Trioxide (SO₃) 22.2%

Directions for use : apply using conventional seed treatment equipment

Application Rates : Apply 4.0 L per tonne of seed

Precautions: Wash hands and exposed skin thoroughly after use.
In case of contact with eyes rinse immediately in plenty of water.
Do not use treated seed for food or feed
Do not re-use empty sacks for food or feed
