

fielder sulfur 90

MINI DISCS

CONTAINS 90% SULPHUR (225% SO₃)

Granular disc formulation for application to the soil to correct and prevent sulphur deficiency in the crop.

Sulfur 90 is formulated as a lentil - shaped granule to facilitate easy and accurate spreading through standard fertiliser spreaders or slug applicators. When the granules come into contact with moisture the granule breaks down releasing fine particles of elemental sulphur which are then oxidised by soil bacteria. The resultant sulphates are then readily available for plant uptake.

RECOMMENDATION FOR USE

RATES OF APPLICATION

Deficiency or severe stress.

Apply 20-25 Kgs/ha When symptoms first appear. Alternatively in high risk situations apply before commencement of rapid growth periods. Sulfur 90 is purposely formulated for ease of application through most slug pellet applicators and granular fertiliser spreaders.

Maintenance:

Apply 15 Kgs/ha During late winter / early spring before commencement of rapid growth.

CROP RECOMMENDATIONS

Fielder Sulfur 90 is recommended for use on most arable, horticultural and fruit crops.

PRECAUTIONS

Keep out of reach of children.

Avoid contact with skin, eyes or clothing.

Prevent livestock access to treated areas for 14 days.

Contents may be harmful to marine life; do not contaminate waterways, ditches, lakes or ponds with containers.

Empty container completely.

Do not store near heat or naked flame.

CONDITIONS OF SUPPLY

All goods supplied by us are of high grade and we believe them to be suitable, but as we cannot exercise control over their storage, handling, mixing or use or of the weather conditions before, during or after application which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded, and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
