

fielder

pHixer

APPLICATION RATE:

Apply at a rate of 0.5% of water sprayer volume per ha.

USAGE SITUATIONS:

Fielder pHixer should be used whenever the pH of water used for spraying is above 6.5, unless the product being applied is unstable in acid medium. Fielder pHixer is compatible with most pesticides, growth regulators and micronutrients. For specific recommendations on compatibilities please contact Fielder for more details.

DIRECTIONS FOR USE

1. Measure pH of water to be used with pH meter or litmus paper prior to filling tank.
2. One-third fill the spray tank with water. Add Fielder pHixer until pH is 6.5 (note the quantity used), or 0.5 litres per 300 litres, whichever is the lower, with agitation.
3. Fill tank normally with products to be applied and remainder of water, maintaining agitation.
4. Add twice the quantity of Fielder pHixer put in earlier, or 1 litre per 300 litres. Maximum rate of use: 1.5 litres per 300 litres total spray volume.

SAFETY PRECAUTIONS:

IRRITANT

Irritating to eyes and skin.
In case of contact with eyes, rinse immediately with plenty of water (for at least 10 minutes) and seek medical advice.
