pHixer

**TANK ACIDIFIER
CONTAINING CITRIC AND
PROPRIONIC ACIDS TO
OPTIMISE pH OF WATER
FOR MINIMAL
BREAKDOWN AND
MAXIMUM EFFICACY**

**For use only as an agricultural
spray tank acidifier.**

Fielder pHixer optimises the acidity of water used for agricultural spraying operations with pesticides, growth regulators and micronutrients. When used in areas of highly alkaline water, it reduces losses due to alkaline hydrolysis in the spray tank, leading to retention of active ingredients and improved efficacy. It is not suitable for use with products which need an alkaline medium for stability.

CONDITIONS OF SUPPLY

All goods we supply are of a high quality. We believe them to be suitable, but as we have no control over storage, handling, mixing or use, or of the state of weather before, during or after application, this may affect the product's performance and all conditions / warranties, statutory or otherwise. No responsibility can be accepted by us, regarding quality or fitness of product, for any failure or damage / injury / performance arising from storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in its use in any way.
