

MANGANESE + COPPER

An inorganic liquid formulation of manganese and copper for those situations where both nutrients are unavailable to meet the crops requirements. Many light and peaty soils are deficient in both. Contains 12%Mn (w/v) and 2%Cu (w/v) both as readily available sulphate salts and in the correct ratio for plant utilisation.

CROP	TIMING	RATE
W Cereals	G.S.21 onwards	2.5 - 3.5L/Ha
	Repeat as necessary every 14 days	
S Cereals	G.S 21 onwards	2.5 - 3.5L/Ha
Rape	Rapid growth phases	2.5 - 3.5L/Ha
Potatoes	When rows meet	2.5L/Ha
	Repeat as necessary every 14 days	
Sugar Beet	4-6 leaves	2.5 - 3.5L/Ha
Peas & Beans	Immediately after flowering	3.5L/Ha
Vegetables	4 – 6 leaves	2.5 - 3.5L/Ha

Pack Size : 10L,210L,1000L
