

# Squall

**Ammonium sulphate based water conditioner 40% ammonium sulphate**

SQUALL is a water conditioner formulated to reduce water pH and allow contact herbicides to maximise their weed-killing activity. Hard waters contain high levels of alkaline salts particularly Calcium and Magnesium carbonates and bicarbonates. These salts interfere with the herbicidal activity of products and reduce their efficacy. The ammonium sulphate in SQUALL bonds with the calcium to form insoluble calcium sulphate which is then rendered inactive.

#### RECOMMENDATIONS FOR USE

Add 1 litre of SQUALL to every 200l water in the spray tank to give a 0.5% spray solution  
Half fill the spray tank and add the required total amount of SQUALL and commence agitation  
Continue agitation while adding pesticide Fill the remaining half of the sprayer with water.

#### Conditions of Supply

All goods supplied by us are of high quality and we believe them to be suitable. As we cannot exercise control over their storage, handling, mixing, use or of the weather conditions before, during or after application which may affect the performance of the goods all conditions and warranties statutory or otherwise as to the quality or fitness for any purpose of our goods, are excluded and no responsibility will be accepted by us or by resellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or SQUALL in the use of such goods

**WARNING:** GHS07

**H315** Causes skin irritation

**H319** Causes serious eye irritation

**H335** May cause respiratory irritation
