

SULPHAN 28

20%Nitrogen ; 14%Sulphate w/v

A foliar liquid formulation of nitrogen in the ammoniacal form and sulphur in the sulphate form for application to all amenity turf to encourage recovery and greening without inducing lush growth

RECOMMENDATION FOR USE

RATES OF APPLICATION

Apply 20-40 litres per Ha throughout the turf growing season on sports fields, bowling greens, fairways, greens and tees . Apply the higher rate to encourage recovery of hard worn and poor growing areas. Repeat applications as required every 3 - 6weeks.

WATER RATE

400-600Litres/Ha

TANK MIXING

Physically and chemically compatible with most pesticides. Check by mixing small amounts in the correct ratio adding Sulphan to water followed by pesticide. Turf may be susceptible to scorch from mixtures applied during periods of rapid growth or stress.

PRECAUTIONS

For best results apply when turf actively growing. Avoid application during very high temperatures and bright sunlight. Keep out of reach of children. Avoid contact with skin, eyes, clothing. Wash exposed area with water. Protect from frost.
