

## *What's in KICK-OFF*

<b>Phosphorous</b>	180g/l as a phosphite/phosphate mix
<b>Manganese</b>	80g/l; equivalent to a 2/3 rate of a standalone manganese dressing
<b>Potassium</b>	40g/l for enzyme manufacture which then stimulate cell division
<b>Nitrogen</b>	20g/l fundamental for protein synthesis and cell development
<b>Zinc</b>	16g/l important component of plant enzymes
<b>Sulphate</b>	10g/l complements the nitrogen
<b>Amino Acids</b>	Assists in protein synthesis
